

System Engineering Design of Offshore Oil Drilling Production Platform from Marine Environment

Authors : C. Njoku Paul

Abstract : This paper deals with systems engineering applications design for offshore oil drilling production platform in the Nigerian Marine Environment. Engineering Design model of the distribution and accumulation of petroleum hydrocarbons discharged into marine environment production platform and sources of impact of an offshore is treated.

Keywords : design of offshore oil drilling production platform, marine, environment, petroleum hydrocarbons

Conference Title : ICBBB 2015 : International Conference on Biotribology, Biomechanics and Bioengineering

Conference Location : San Francisco, United States

Conference Dates : June 07-08, 2015
