

Positive Impact of Cartoon Movies on Adults

Authors : Yacoub Aljaffery

Abstract : As much as we think negatively about social media such as TV and smart phones, there are many positive benefits our society can get from it. Cartoons, for example, are made specifically for children. However, in this paper, we will prove how cartoon videos can have a positive impact on adults, especially college students. Since cartoons are meant to be a good learning tool for children, as well as adults, we will show our audience how they can use cartoon in teaching critical thinking and other language skills.

Keywords : social media, TV, teaching, learning, cartoon movies
