

Flux-Linkage Performance of DFIG Under Different Types of Faults and Locations

Authors : Mohamed Moustafa Mahmoud Sedky

Abstract : The double-fed induction generator wind turbine has recently received a great attention. The steady state performance and response of double fed induction generator (DFIG) based wind turbine are now well understood. This paper presents the analysis of stator and rotor flux linkage dq models operation of DFIG under different faults and at different locations.

Keywords : double fed induction motor, wind energy, flux linkage, short circuit

Conference Title : ICSRD 2020 : International Conference on Scientific Research and Development

Conference Location : Chicago, United States

Conference Dates : December 12-13, 2020
