

Ecosystem Model for Environmental Applications

Authors : Cristina Schreiner, Romeo Ciobanu, Marius Pislaru

Abstract : This paper aims to build a system based on fuzzy models that can be implemented in the assessment of ecological systems, to determine appropriate methods of action for reducing adverse effects on environmental and implicit the population. The model proposed provides new perspective for environmental assessment, and it can be used as a practical instrument for decision-making.

Keywords : ecosystem model, environmental security, fuzzy logic, sustainability of habitable regions

Conference Title : ICEBESE 2014 : International Conference on Environmental, Biological, Ecological Sciences and Engineering

Conference Location : Madrid, Spain

Conference Dates : March 27-28, 2014
