

Instructional Design Strategy Based on Stories with Interactive Resources for Learning English in Preschool

Authors : Vicario Marina, Ruiz Elena, Peredo Ruben, Bustos Eduardo

Abstract : the development group of Educational Computing of the National Polytechnic (IPN) in Mexico has been developing interactive resources at preschool level in an effort to improve learning in the Child Development Centers (CENDI). This work describes both a didactic architecture and a strategy for teaching English with digital stories using interactive resources available through a Web repository designed to be used in mobile platforms. It will be accessible initially to 500 children and worldwide by the end of 2015.

Keywords : instructional design, interactive resources, digital educational resources, story based English teaching, preschool education
