

Design for Sustainability

Authors : Qiuying Li, Fan Chen

Abstract : It is a shared opinion that sustainable development requires continuously updated, meaning that apparent changes in the way we usually produce our buildings are strongly needed. In China's construction field, the associated environmental, health problems are quite prominent. Especially low sustainable performance (as opposed to Green creation) flooding the real estate boom and high-speed urban and rural urbanization. Currently, we urgently need to improve the existing design basis, objectives, scope and procedures, optimization design portfolio. More new evaluation system designed to facilitate the building to enhance the overall level.

Keywords : design for sustainability, design and materials, ecomaterials, sustainable architecture and urban design

Conference Title : ICSAUD 2015 : International Conference on Sustainable Architecture and Urban Design

Conference Location : Chicago, United States

Conference Dates : October 08-09, 2015
