

The Attitude of Students towards the Use of the Social Networks in Education

Authors : Abdulmjeid Aljerawi

Abstract : This study aimed to investigate the students' attitudes towards the use of social networking in education. Due to the nature of the study, and on the basis of its problem, objectives, and questions, the researcher used the descriptive approach. An appropriate questionnaire was prepared and validity and reliability were ensured. The questionnaire was then applied to the study sample of 434 students from King Saud University.

Keywords : social networks, education, learning, students
