

Hotel and Service Industry in USA: Is It Leveraged? Case Study of Seven Important Hotel Chains

Authors : Azadeh Shahbazi

Abstract : This study tries to find out the determinants of capital structure in hotel industry in 7 important hotel chains in USA within the period of 12 years of 2000 to 2012. The study is used a panel pooled regression to realize the relation among different variables. Results show that the variables which could make changes in the capital structure of firms are Non-Debt Tax Shield and Tangibility.

Keywords : capital structure, service industry, hospitality, finance
