

Intrusion Detection Techniques in NaaS in the Cloud: A Review

Authors : Rashid Mahmood

Abstract : The network as a service (NaaS) usage has been well-known from the last few years in the many applications, like mission critical applications. In the NaaS, prevention method is not adequate as the security concerned, so the detection method should be added to the security issues in NaaS. The authentication and encryption are considered the first solution of the NaaS problem whereas now these are not sufficient as NaaS use is increasing. In this paper, we are going to present the concept of intrusion detection and then survey some of major intrusion detection techniques in NaaS and aim to compare in some important fields.

Keywords : IDS, cloud, naas, detection

Conference Title : ICCSM 2015 : International Conference on Computer Science and Mathematics

Conference Location : Los Angeles, United States

Conference Dates : September 28-29, 2015
