

Using WebQuest for Developing English Reading Comprehension Skills for Preparatory Experimental School Students: Proposed Design

Authors : Sarah Hamdy Abd-Al Hamid Seyam

Abstract : The research aimed investigating the effect of using web quest on developing English reading comprehension skills for preparatory experimental school students. The descriptive design was adopted in the study. The tools of the study are represented in: a checklist for the English reading comprehension skills and a test of the English reading comprehension skills for the first year preparatory experimental school students. Results of the study were discussed in relation to various factors that affect the learning process. Finally the research presented applicable contributions according to using web quest in teaching English as a foreign language generally and improving reading comprehension in particular.

Keywords : English as a second language, preparatory experimental schools, reading comprehension, WebQuest
