## CFD Study for Normal and Rifled Tube with a Convergence Check

Authors : Sharfi Dirar, Shihab Elhaj, Ahmed El Fatih

**Abstract :** Computational fluid dynamics were used to simulate and study the heated water boiler tube for both normal and rifled tube with a refinement of the mesh to check the convergence. The operation condition was taken from GARRI power station and used in a boundary condition accordingly. The result indicates the rifled tube has higher heat transfer efficiency than the normal tube.

 ${\bf Keywords}:$  boiler tube, convergence check, normal tube, rifled tube
