

## **Rural Landscape Design-Method Researching Based on the Population Diversification**

**Authors :** Zhou Ziyi, Chen Qiuxiao, Wu Shuang

**Abstract :** Population diversification is very common in villages located in the developed coastal areas of China. Based on the analyses of the characteristics of the traditional rural society and its landscape, also in consideration of the diversified landscape demand due to the population diversification of the village, with the dual ideas of heritage and innovation, the ideas and methods of rural landscape design were explored by taking Duxuao Village in Zhejiang Province of China as an example.

**Keywords :** rural landscape, population diversification, landscape design, architecture
