

Parents' Perception on the Use of Mobile Technology by Young Children

Authors : Jason Gan

Abstract : Technology has been around for many years, those that play a crucial part of our lives have evolved quick and fast, from televisions to computers and now mobile technology has also become a part of our lives. However in Singapore a nation with a strong reliance and following in technology, how are young children (0 to 8 years old) coping with these high technology equipment especially mobile technology and why and what are parents doing to manage this trend in the nation. This study aims to uncover some of the parents' perception behind the use of mobile technology by their children.

Keywords : technology, preschoolers, ICT and Singapore, early childhood
