

The Impact of Technology on Cultural Heritage among Preschool Children

Authors : Adenike Akinrotimi

Abstract : Globally, education has been identified as vital tool for any form of development for any society (community); be it economic, social, political and cultural development. It is the determinant level of prosperity, welfare, security and sustenance of the people of a particular community. Education could be formal, informal and non-formal. Cultural development of an individual and of the community as it were is a lifelong process, where individual learns from daily experiences, exposure to the environment at home, at work, at play and it enriches human and environmental potentials. This type of education can be referred to as cultural heritage. It is built on learner participation and assimilation. Preschool programme also referred to as Early Childhood Education is critical to holistic development of a child cultural development inclusive. This paper examines the impact that technology has on cultural heritage among preschool children.

Keywords : cultural heritage, education, pre-school, technology
