

## Protection of the Object of the Critical Infrastructure in the Czech Republic

**Authors :** Michaela Vašková

**Abstract :** With the increasing dependence of countries on the critical infrastructure, it increases their vulnerability. Big threat is primarily in the human factor (personnel of the critical infrastructure) and in terrorist attacks. It emphasizes the development of methodology for searching of weak points and their subsequent elimination. This article discusses methods for the analysis of safety in the objects of critical infrastructure. It also contains proposal for methodology for training employees of security services in the objects of the critical infrastructure and developing scenarios of attacks on selected objects of the critical infrastructure.

**Keywords :** critical infrastructure, object of critical infrastructure, protection, safety, security, security audit
