

Providing Open Access for Scholarly Information in Libya

Authors : Mohamed Abolgasem Arteimi, Ahlam Al-Tajori

Abstract : This paper describes an ongoing project at the Libyan Academy. The project aims to build digital library for thesis and dissertations (ETD). The researchers developed a system based on Greenstone open source systems for building ETD digital library. A metadata for theses and dissertations was developed. The paper addresses issues related to project design, development and user satisfaction. Conclusions highlighted some important lessons learned to date.

Keywords : digital library, electronic theses and dissertations, open access, ETD, metadata
