

## Mechanisms of Cultural Change Resistance through Cultures

**Authors :** Horaya Mostafa Ahmed

**Abstract :** All cultures are inherently predisposed to change and, at the same time, to resisting change. There are dynamic processes operating that encourage the acceptance of new ideas and things, while there are others that encourage changeless stability. Despite the dramatic changes that have taken place in all human cultures, there are cultures still steadfast and resist change. These cultures resist through some culture mechanisms like, cultural boundaries, ethnocentrism, religion, and cultural relativity. So this paper is an attempt to discover these mechanisms of cultural change resistance and to ask is cultural change always required.

**Keywords :** cultural change, cultural boundaries, cultural relativity, ethnocentrism, religion, resistance
