

## **Resilience in Children: A Comparative Analysis between Children with and without Parental Supervision Bandar Abbas**

**Authors :** N. Taghinejad, F. Dortaj, N. Khodabandeh

**Abstract :** This research aimed at comparing resilience among male and female children with and without parental supervision in Bandar Abbas. The sample consists of 200 subjects selected through cluster sampling. The research method was comparative causal and Conner and Davidson's questionnaire form resilience was used for data collection. Results indicated that there is no difference between children with and without parental supervision regarding their resilience capacity. These findings may be challenging and useful for psychologists, officials of children's affairs and legislators.
