

The Roles of Education, Policies and Technologies in the Globalization Processes of Creative Industry

Authors : Eureka Haishang Wu

Abstract : Creative Industry has been recognized as top priority in many nations for decades, as through globalization processes, culture can be economized by creative industry to develop economies. From non-economic perspectives; creative industry supports nation-identity, enhances global exposure, and improve international relation. In order to enable the globalization processes of creative industry, a three-step approach was proposed to align education, policies, and technologies into a transformation platform, and eventually to achieve a common model of global collaboration.

Keywords : creative industry, education, policies, technologies, collaboration, globalization
