

## Effect of R&D Human Capital Support for SMEs: An Analysis of Smes Support Program in South Korea

**Authors :** Misun Kim, Beomsoo Park

**Abstract :** Korean government has strongly supported SMEs financially and technically. It has also changed R&D manpower management so that SMEs can benefit from the knowledge of highly qualified experts. This study evaluates the impacts of such policy on SMEs and analyzes the factors affecting the growth of the firms. Then we compare the characteristics of high growth companies to general companies. This factors could be use in the future for identifying firms that would significantly benefit from manpower help.
