

The Application of Animal Welfare for Slaughterhouses in Bali Island

Authors : Budi B. Leksono, Mustopa

Abstract : This study aims to determine the application of animal welfare at slaughterhouses in Bali island. The method used is purposive sampling. This study conducted by two slaughterhouses are in Denpasar districts and Badung districts in the Bali island. The result shows the percentage the application of animal welfare when the animal unloading the truck to shelter animal in the Denpasar slaughterhouse is 73.19%, whereas in Badung slaughterhouses are 63.04%. Percentage of the application of animal welfare when shelter animal to slaughter in the Denpasar slaughterhouses is 52.93%, whereas in Badung slaughterhouses are 75.96%. Based on these results, we can conclude that the slaughterhouses in the Bali island has been applying the principles of animal welfare, but needs to increase some aspects of animal welfare.

Keywords : animal welfare, Bandung slaughterhouses, Bali Island, Denpasar slaughterhouses
