

Provision Electronic Management Requirements in Libyan Oil Companies

Authors : Hitham Yami

Abstract : This study will focus primarily on assessing the availability requirements of the electronic management of oil companies in Libya, and the main objectives of the research applying electronic management and make recommendations and steps to approach electronic management. There are limited research and statistical analysis to support electronic management in Libyan companies. The groundwork for the proposed approach is to develop independent variables and the dependent variables to be restructured after it Alntra side of the field and the side to get the data to achieve the desired results and solving the problem faced by the Libyan Oil Corporation. All these strategies are proposed to achieve the goal, and solving Libyan oil installations.

Keywords : oil company's revenue, independent variables, electronic management, Libyan oil corporation
