

A Transfer Function Representation of Thermo-Acoustic Dynamics for Combustors

Authors : Myunggon Yoon, Jung-Ho Moon

Abstract : In this paper, we present a transfer function representation of a general one-dimensional combustor. The input of the transfer function is a heat rate perturbation of a burner and the output is a flow velocity perturbation at the burner. This paper considers a general combustor model composed of multiple cans with different cross sectional areas, along with a non-zero flow rate.

Keywords : combustor, dynamics, thermoacoustics, transfer function

Conference Title : ICEEE 2016 : International Conference on Electrical and Electronics Engineering

Conference Location : Bangkok, Thailand

Conference Dates : December 12-13, 2016
