

The Assesment of Animal Welfare at Slaughterhouses in Badung District, Bali Province

Authors : Ulil Afidah, Mustopa

Abstract : The study aims to determine the assessment of animal welfare at slaughterhouses in Badung district, Bali province. The study was conducted for ten days with observed five cattle per day with a total 50 cattle. Observation begins when a cow came out of the pick up to be slaughtered, subsequently recorded in a questionnaire that has been provided. The result of the observation showed that the slaughterhouses in Bandung district have the implemented animal welfare which fulfills the requirement that is 63% before slaughtering process, and 76% at slaughtering process. Based on these results it can be concluded in slaughterhouses of Badung district already fulfill the requirements.
