

Recent Advances in Data Warehouse

Authors : Fahad Hanash Alzahrani

Abstract : This paper describes some recent advances in a quickly developing area of data storing and processing based on Data Warehouses and Data Mining techniques, which are associated with software, hardware, data mining algorithms and visualisation techniques having common features for any specific problems and tasks of their implementation.

Keywords : data warehouse, data mining, knowledge discovery in databases, on-line analytical processing

Conference Title : ICSRD 2020 : International Conference on Scientific Research and Development

Conference Location : Chicago, United States

Conference Dates : December 12-13, 2020
