

Metaphysical and Mystical Viewpoints of Roozbihan Baqli Shirazi on the Quran

Authors : Seyed Abdol Majid Hosseinizadeh

Abstract : This study aims at an assessment of the part of interpretational issues on the Quran in Roozbihan Baqli Shirazi's books, who has been a mystic and Sufi in the 12th century. He has written many mystical books which Henry Corbin and others have introduced and researched, especially his commentary on the Quran called Ara'is al-Bayan, but he also has other interpretational viewpoints on the Quran spread throughout his mystical works, which have not been considered. In this paper, it has been shown through a documentary method that Quranic verses and their interpretations also have a great role in his other works.
