

Challenges in Multi-Cloud Storage Systems for Mobile Devices

Authors : Rajeev Kumar Bedi, Jaswinder Singh, Sunil Kumar Gupta

Abstract : The demand for cloud storage is increasing because users want continuous access their data. Cloud Storage revolutionized the way how users access their data. A lot of cloud storage service providers are available as DropBox, G Drive, and providing limited free storage and for extra storage; users have to pay money, which will act as a burden on users. To avoid the issue of limited free storage, the concept of Multi Cloud Storage introduced. In this paper, we will discuss the limitations of existing Multi Cloud Storage systems for mobile devices.

Keywords : cloud storage, data privacy, data security, multi cloud storage, mobile devices

Conference Title : ICBDAIE 2017 : International Conference on Big Data Analytics and Information Engineering

Conference Location : Vancouver, Canada

Conference Dates : August 07-08, 2017
