

Nanoparticles and Nanoproducts in Medicine Applications

Authors : Shideh Mohseni Movahed, Mansoureh Safari, Ali Safari

Abstract : In this paper, the state of play and prospect of nanoparticles and nanoproducts in medicine have been discussed. Advances in terms of scientific knowledge in the Nanosciences (nanotechnologies and/or nanomaterials) have and already translated into an industrial and economic reality. Just like other sectors in the phase of launching products in the markets, it is to consider the introduction of these new products in order to measure and control potential consequences in terms of health impacts on humans and the environment, but also in terms of societal impacts.

Keywords : nanoparticles, nanoproducts, medicine, health

Conference Title : ICBB 2018 : International Conference on Bioengineering and Biosciences

Conference Location : Madrid, Spain

Conference Dates : March 26-27, 2018
