

Linguistic Summarization of Structured Patent Data

Authors : E. Y. Igde, S. Aydogan, F. E. Boran, D. Akay

Abstract : Patent data have an increasingly important role in economic growth, innovation, technical advantages and business strategies and even in countries competitions. Analyzing of patent data is crucial since patents cover large part of all technological information of the world. In this paper, we have used the linguistic summarization technique to prove the validity of the hypotheses related to patent data stated in the literature.

Keywords : data mining, fuzzy sets, linguistic summarization, patent data

Conference Title : ICFIE 2017 : International Conference on Fuzzy Information and Engineering

Conference Location : Madrid, Spain

Conference Dates : September 11-12, 2017
