

Effect of Non-Tariff Measures to Indonesian Shrimp Export in International Market: Case of Sanitary and Phytosanitary and Technical Barriers to Trade

Authors : Muhammad Khaliqi, Amzul Rifin, Andriyono Kilat Adhi

Abstract : The non-tariff policy could make Indonesian shrimp exports decrease in the international market. This research was aimed to analyze factors affecting Indonesia's exports of shrimp and the impact of SPS and TBT policy on Indonesian shrimp. Factors affecting the exports of Indonesian shrimp were estimated using gravity model. The results showed the GDP of exporters and exchange rate, have a negative influence against the export of Indonesia's shrimp exports. The GDP of the importers and trade cost have a positive influence against the export of shrimp Indonesia while the SPS policy and TBT don't affect Indonesia's exports of shrimp in the international market.

Keywords : gravity model, international trade, non-tariff measure, sanitary and phytosanitary, shrimp, technical barriers to trade
