

Impact and Implementation of Privatization of State-Owned Enterprise Sustainability in Indonesia

Authors : Afri Ananda Nugroho

Abstract : Privatization is one of the public policies closely related to the role of government in the economy due to the failure of the centralized system in the communist countries. This paper will discuss the basic issues of privatization as a global trend, the purpose of privatization, implementation, and impact on the success of State-Owned Enterprises (BUMN) in Indonesia. The analysis is done by looking at some important issues about the privatization problem, and some public policies are being applied such as why and how privatization is necessary and what impact it has. This paper also discusses the implications for top leaders of State-Owned Enterprises.

Keywords : privatization, state-owned enterprises, Indonesia, public policy
