

Participation, Network, Women's Competency, and Government Policy Affecting on Community Development

Authors : Nopsarun Vannasirikul

Abstract : The purposes of this research paper were to study the current situations of community development, women's potentials, women's participation, network, and government policy as well as to study the factors influencing women's potentials, women's participation, network, and government policy that have on the community development. The population included the women age of 18 years old who were living in the communities of Bangkok areas. This study was a mix research method of quantitative and qualitative method. A simple random sampling method was utilized to obtain 400 sample groups from 50 districts of Bangkok and to perform data collection by using questionnaire. Also, a purposive sampling method was utilized to obtain 12 informants for an in-depth interview to gain an in-sight information for quantitative method.

Keywords : community development, participation, network, women's right, management
