

Corporate Governance and Bank Performance: A Study of Selected Deposit Money Banks in Nigeria

Authors : Ayodele Ajayi, John Ajayi

Abstract : This paper investigates the effect of corporate governance with a view to determining the relationship between board size and bank performance. Data for the study were obtained from the audited financial statements of five sampled banks listed on the Nigerian Stock Exchange. Panel data technique was adopted and analysis was carried out with the use of multiple regression and pooled ordinary least square. Results from the study show that the larger the board size, the greater the profit implying that corporate governance is positively correlated with bank performance.

Keywords : corporate governance, banks performance, board size, pooled data
